Introduction

The Word Counter website allows you to count words in a given text. This README file provides step-by-step instructions on how to set up the project locally.

Getting Started

CHITKARA UNIVERSITY

Prerequisites

Make sure you have the following installed on your machine:

•Web browser (e.g., Google Chrome, Mozilla Firefox)

•Text editor (e.g., Visual Studio Code, Sublime Text)

Installations :

Copy all the html,css files and folder naming (images) and paste it in your PC in one single folder name “templates” and the code of python in “app.py” file.

Name	Date modified	Type	Size
templates	05-12-2023 14:28	File folder	
app	05-12-2023 14:37	Python Source File	1 KB

Figure1.1&1.2 : Files should be stored in this Manner

login	11-10-2023 09:26	Chrome HTML Do...	2 KB

Running the Website

CHITKARA UNIVERSITY

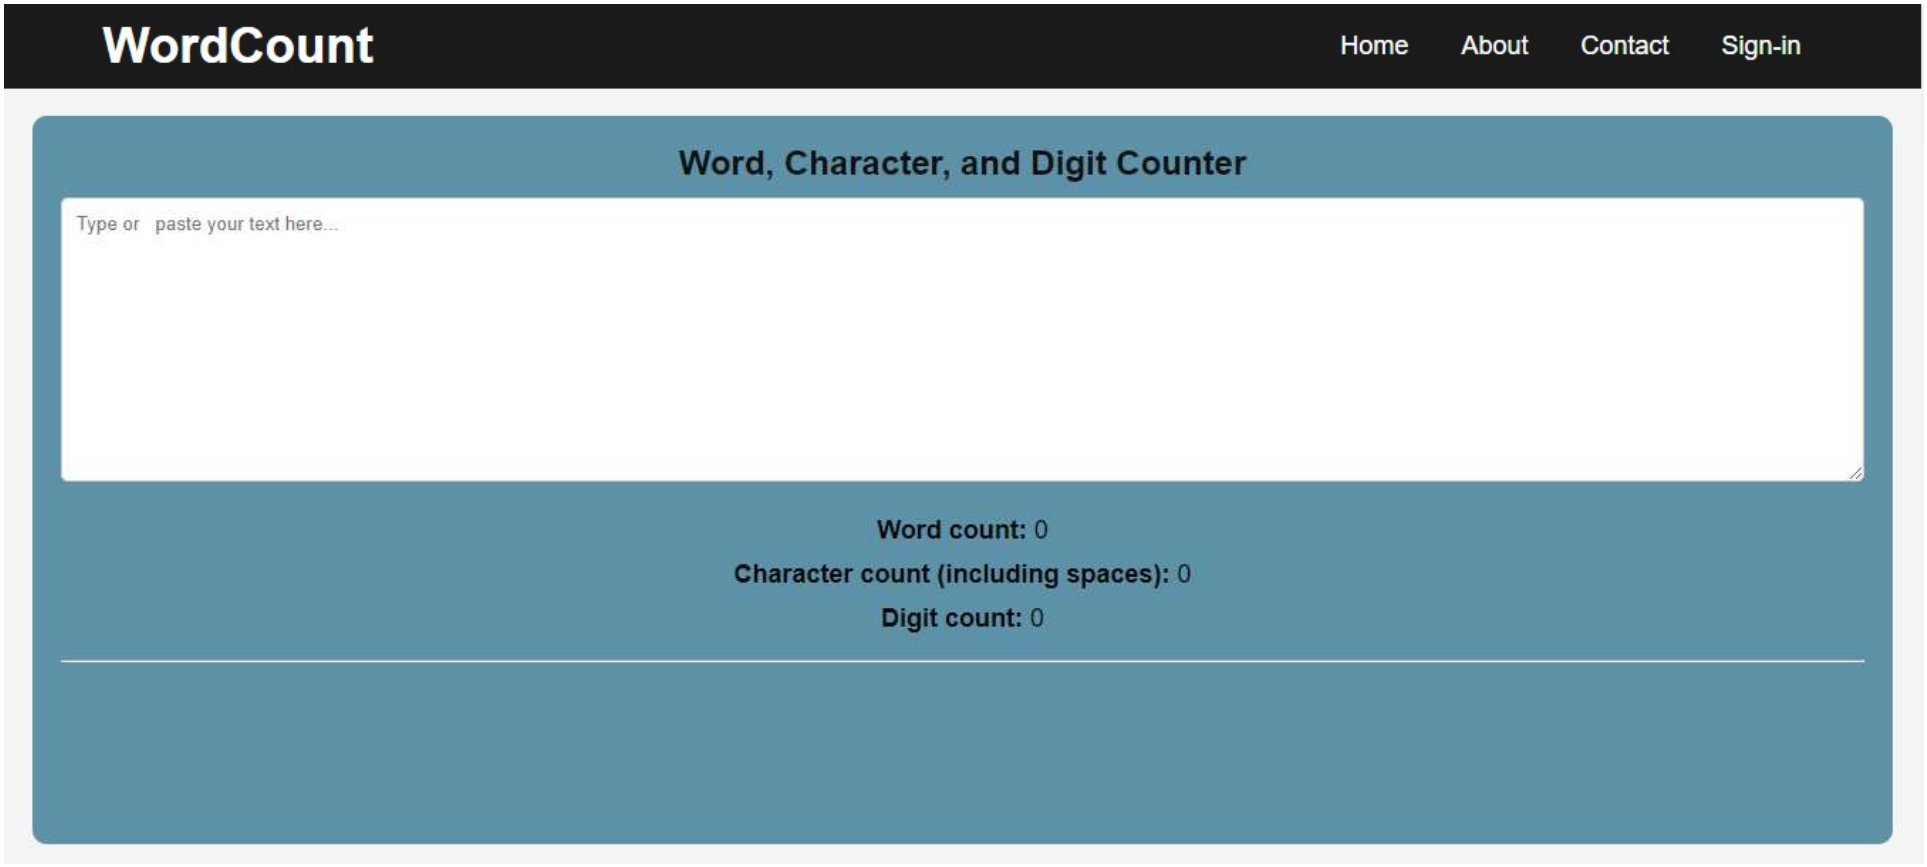
- Locate the index.html file in the project directory.
- Open index.html with your web browser. You can do this by right-clicking on the file and selecting "Open with" your browser.
- The Word Counter website should now be running in your browser.

Exploring Website

CHITKARA UNIVERSITY

As soon as you open index.html file in your browser, the first thing you will see is the below shown Front Page.

If you click on the “COUNT NOW” button, you will be redirected to the main section. In which you will enter text and the webpage will show you the result.



Or if you are a new user and do not know what is the use of Word Counter, then you will click on “LEARN MORE” button. You will be redirected to WIKIPEDIA webpage where you can get complete information about Word Counter.

The **word count** is the number of words in a document or passage of text. Word counting may be needed when a text is required to stay within certain numbers of words. This may particularly be the case in academia, legal proceedings, journalism and advertising. Word count is commonly used by translators to determine the price of a translation job. Word counts may also be used to calculate measures of readability and to measure typing and reading speeds (usually in words per minute). When converting character counts to words, a measure of 5 or 6 characters to a word is generally used for English.[1]

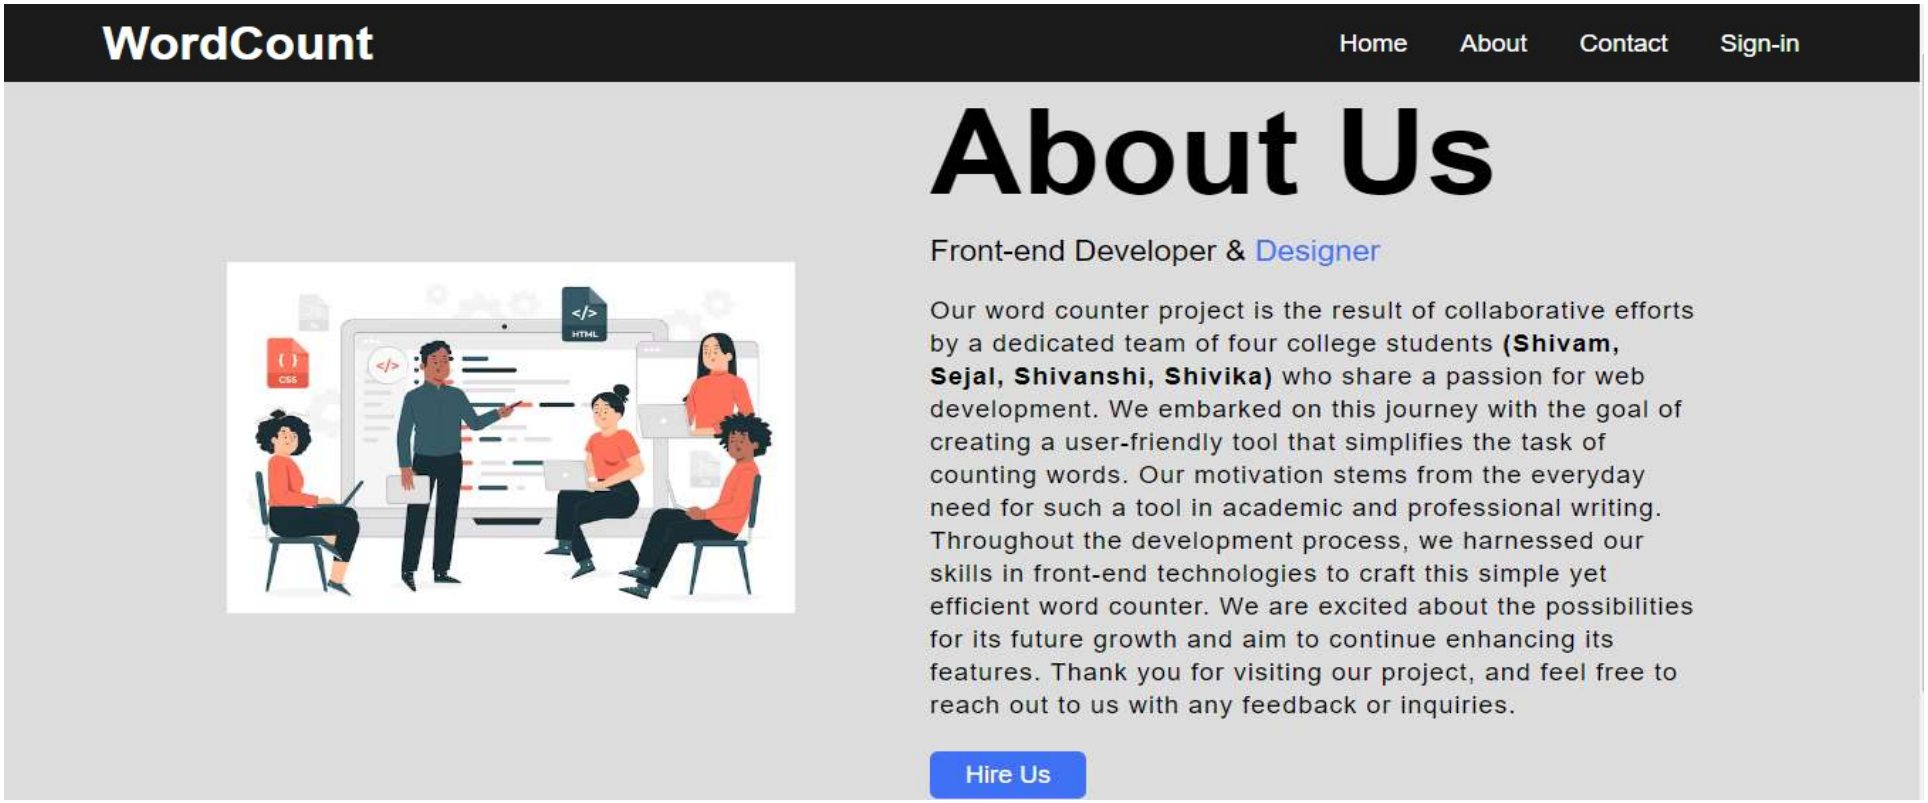
Software [edit]

Modern web browsers support word counting via extensions, via a JavaScript bookmarklet, or a script that is hosted in a website. Most word processors can also count words. Unix-like systems include a program, *wc*, specifically for word counting. There are a wide variety of word counting tools available online. Different word counting programs may give varying results, depending on the text segmentation rule details. The exact number of words often is not a strict requirement, thus the variation is acceptable.

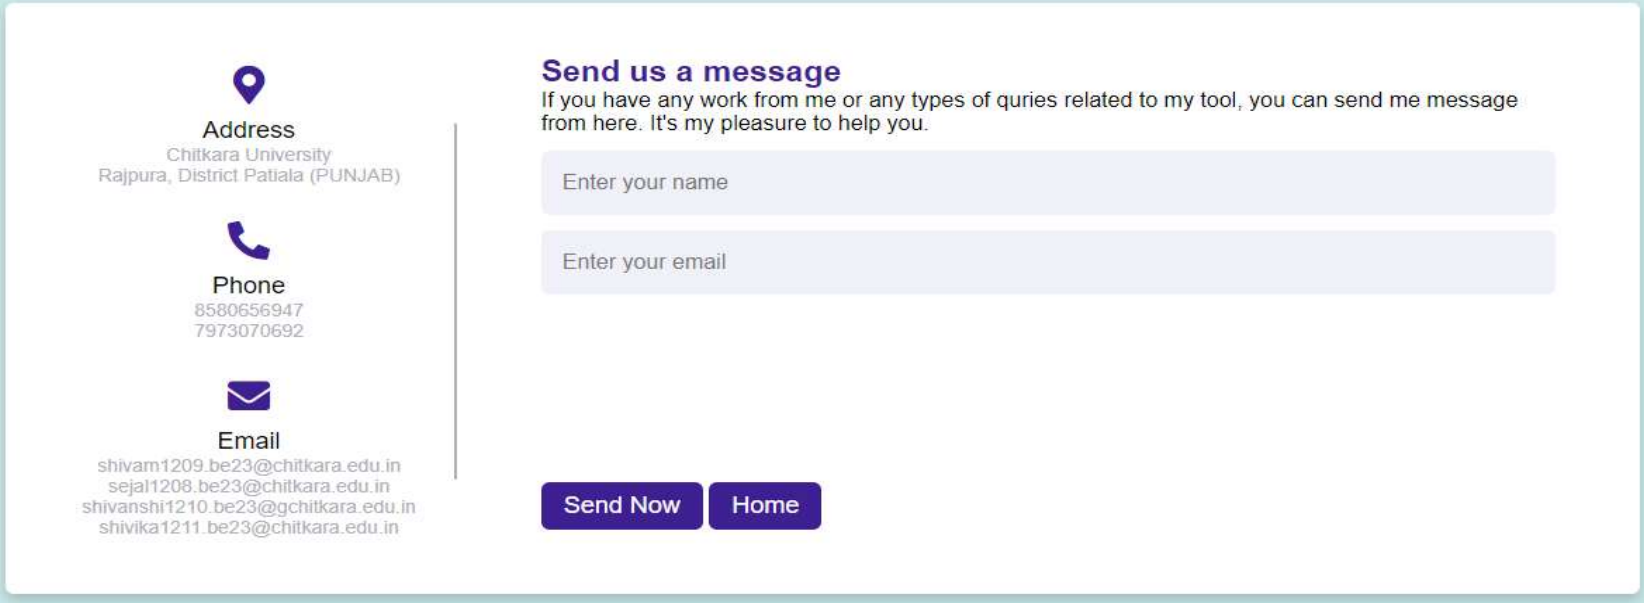
In fiction [edit]

Novelist Jane Smiley suggests that length is an important quality of the novel.[2] However, novels can vary tremendously in length; Smiley lists novels as typically being between 100,000 and 175,000 words,[3] while National Novel Writing Month requires its novels to be at least 50,000 words. There are no firm rules: for example, the boundary between a novella and a novel is arbitrary and a literary work may be difficult to categorise.[4] But while the length of a

In the navigation bar, you will see a link with the name of ‘About Us’. If you click on it, a new page will open in which you can gather information about our entire team.



At the end of ‘About Us ’ page, you will get the option of ‘CONTACT US’, by clicking on it a new webpage will open and you have to enter your Name and E-mail for contacting us.



Usage

CHITKARA UNIVERSITY

- Enter or paste the text you want to analyze into the input field.
- As soon as you type or enter text in input field, the webpage will automatically count Word, Digits, Character(including spaces).
- Explore other features as needed.
